cognizant

CIS INFRA · INTERNAL OFFERING PROPOSAL · FOR SENIOR LEADERSHIP REVIEW

Managed AI Platform Operations

Run the Azure AI platform with clear ownership, proposed service objectives and monthly evidence

Recurring CIS Infra service with defined handoffs to AI, Data and Security · US, Europe, UK and Middle East pursuits

PROPOSED OFFERING

One accountable operator runs the AI platform each month

Problem AI workloads reach production with unowned alerts, unclear tower handoffs, drifting costs and no rehearsed way to stop an agent.

Offer A recurring service: platform health, incidents, changes, agent inventory, monthly cost and lifecycle reviews; containment once proven in 02.

Outcome One service entry point, named resolvers per lane, proposed objectives, monthly evidence and a staffed price.

Value Incidents resolved inside target; steady production use of Azure.

Decision requested

- Approve three proposed coverage packages for pilots
- No 24x7 offer without a funded roster
- Sponsor internal support agreements with towers

Limit: Platform operations are not AI quality management or security operations. Those stay with their towers.

Agents, stops and model retirements all need running

Agents need operating

Agent 365 is GA since 1 May 2026; registries, policies and identities need day-to-day owners.

Source: Microsoft Security blog

Stop needs a runbook

Stopping a Foundry agent does not end runs already in progress, so containment must be drilled.

Source: Foundry Control Plane docs

Models keep retiring

gpt-4.1 retires 14 Apr 2027; provisioned deployments are not auto-upgraded.

Source: Foundry retirement schedule

Who buys

IT service owner with the AI platform leader; CISO delegate for containment; FinOps lead for reviews.

What triggers the purchase

An AI workload entering production; an agent incident; engineering firefighting the platform; unplanned spend.

No pipeline or customer demand is claimed. Account shortlist and qualification scorecard: appendix Q1.

PROPOSED PORTFOLIO

05 runs what 01 to 04 build, and feeds evidence back

Microsoft ecosystem around the portfolio

M365 Copilot

Owned by Cognizant M365 and D365 teams; CIS Infra supplies

HANDOFF

Copilot Studio

Agents covered as a runtime in offerings 02 to 05

COVERED RUNTIME

Agent 365

Microsoft agent control plane; configure before any custom build

CONFIGURE FIRST

API Center

Registry for APIs and MCP tools, beside API Management

CIS INFRA BUILDS

Receives from 01 and 03

Accepted platform, gateway, runbooks, alert routing

Receives from 02 Governance

Catalogue, containment plane and drills

Hands to 04 FinOps

Monthly utilisation and cost evidence

PROPOSED BOUNDARIES

Three lanes keep platform, quality and security apart

Platform availability
Accountable: CIS Infra

- Resource health, dependencies
- Network, DNS, identity plumbing
- Gateway and capacity
- Platform recovery

Agent task quality
Accountable: AI tower

- Wrong or poor answers
- Tool misuse by design
- Evaluation drift
- Model and prompt changes

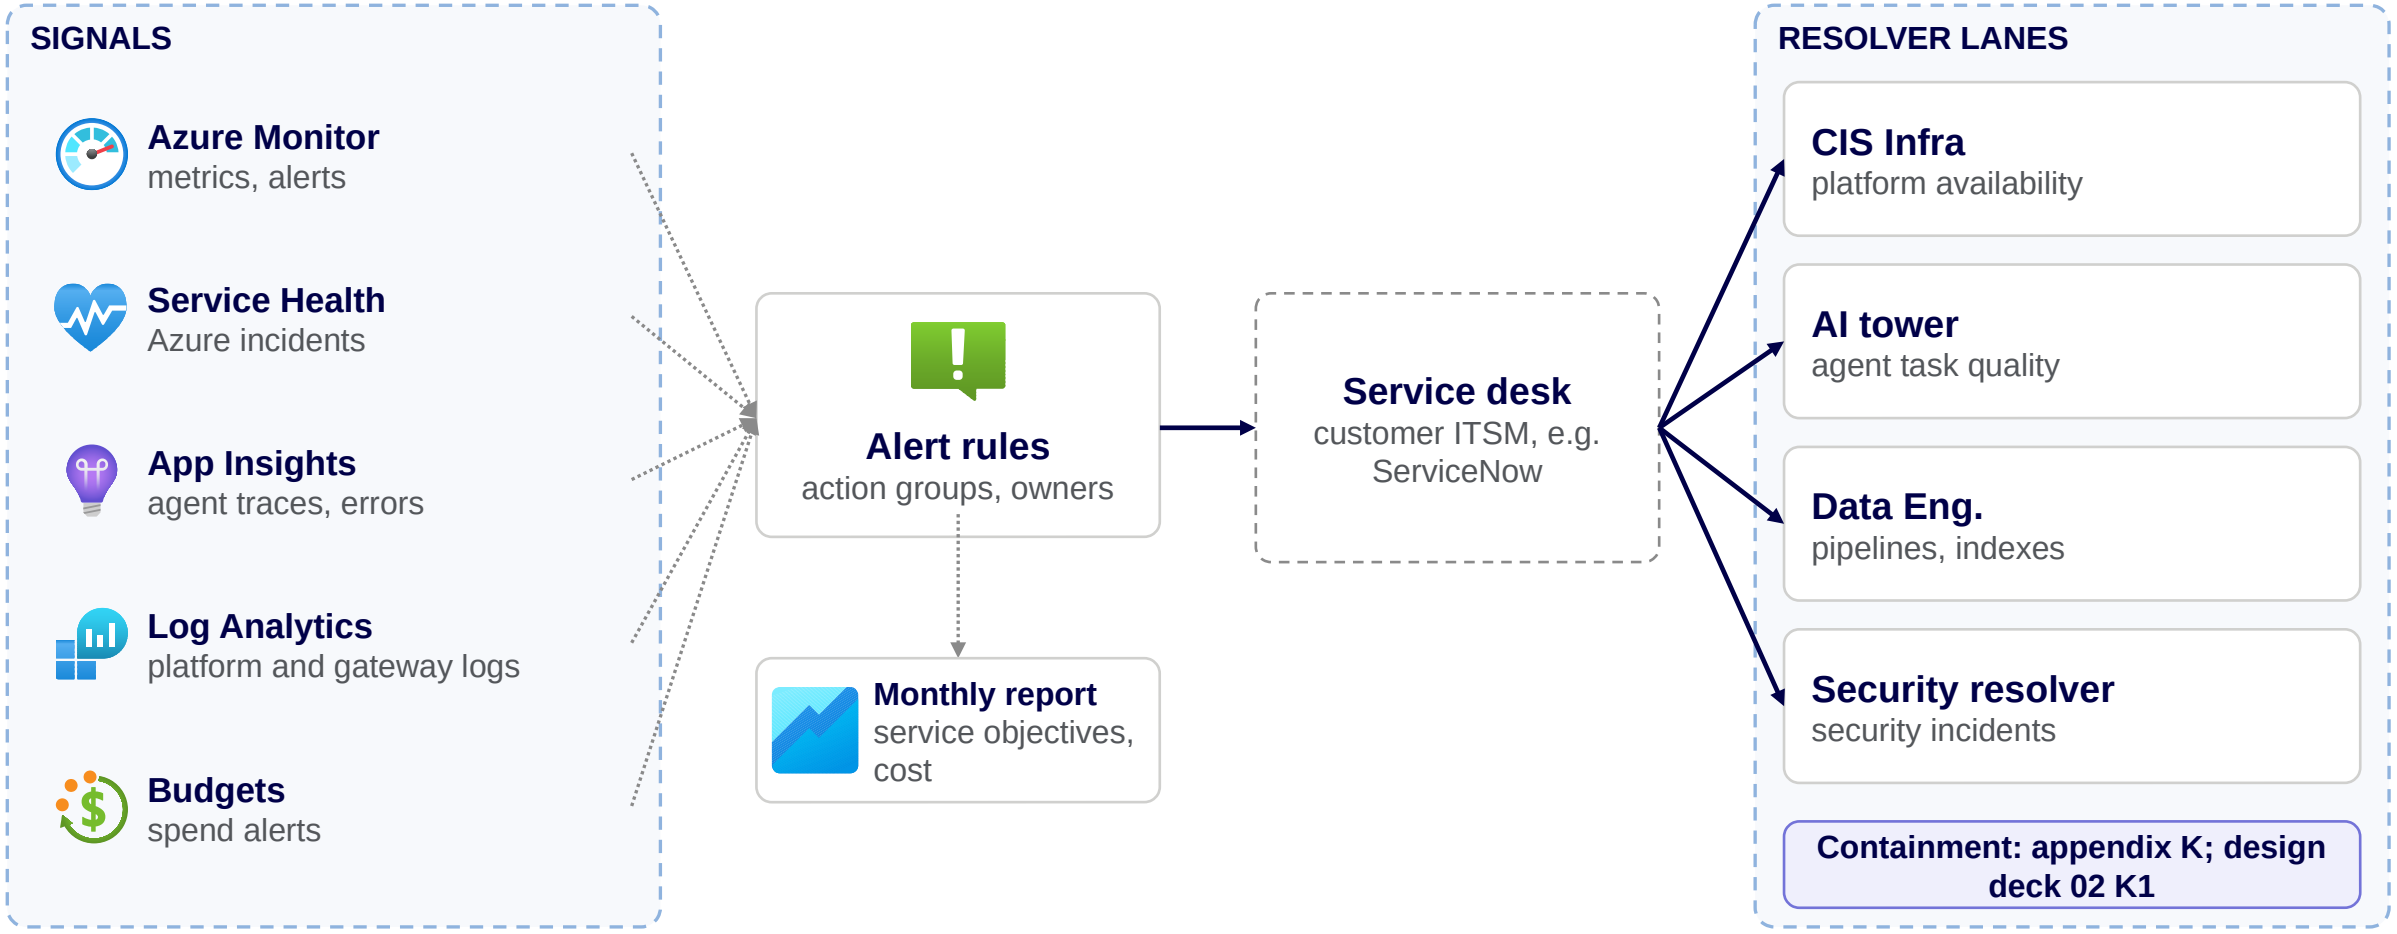

Security incidents
Accountable: Contracted security resolver

- Attack or data exposure
- Containment authority
- Forensics, notification
- Contains its parts once proven

Decision: One service desk entry point routes to the right lane. CIS Infra does not own model quality or security operations.

PROPOSED REFERENCE ARCHITECTURE

Every alert reaches one desk and the right resolver

Request / data flow Telemetry or state read

Proposed reference architecture · CIS Infra custom design · not a Microsoft-published or Microsoft-endorsed architecture

ESTIMATE, NOT APPROVED

Price follows staffing: 1.5 to 10 FTE per package

Package	Effort (role days)	Staffing or time	Indicative fee band*
Foundation: business hours	30 to 60 per month	1.5 to 3 FTE	$30k to $60k per month
Extended: two time zones	60 to 100 per month	3 to 5 FTE	$60k to $100k per month
Continuous: 24x7 roster	120 to 200 per month	6 to 10 FTE	$120k to $200k per month
Onboarding (one-time)	20 to 40	4 to 8 weeks	$20k to $40k
Exit and transition	15 to 30	4 to 6 weeks	$15k to $30k

What moves an engagement to the high end: many agents or runtimes, 24x7 containment, several regions, strict change windows, low platform maturity.

Note: *Fee band = role days x illustrative $1,000 per day. Not a Cognizant rate or quote. Azure and licence spend are separate.

PROPOSED, NOT APPROVED

Response targets are proposed, not yet approved

PROPOSED targets for pilot discussion only · not contractual · valid inside coverage hours

Priority	Example	Response target (proposed)	Update cadence (proposed)
P1	Platform outage affecting production AI	30 minutes	Every hour
P2	Degraded platform, gateway throttling	2 hours	Every 4 hours
P3	Single component issue, workaround exists	1 business day	Daily
P4	Request or question	3 business days	On change

Limit: Response, not resolution. Restore objectives need dependency tests and depend on Azure service health.

Tower agreements and a funded roster decide success

No tower agreements

Effect: Tickets stall between towers

Handle: Signed internal agreements before go-live

Owner: Integrated service owner

24x7 sold without roster

Effect: Missed obligations

Handle: Funded roster before contract

Owner: Delivery leadership

Platform not accepted

Effect: Operating unknown risk

Handle: Onboarding gate (appendix A1)

Owner: CIS Infra

Containment authority unclear

Effect: Slow or contested stop

Handle: Named authority; quarterly drills

Owner: Customer risk owner

Security threat model and regulatory notes: appendix SEC1 and SEC2.

TARGETS AFTER PILOT

Measure response and service; approve pilot packages

Success measures

Response tickets meeting the agreed target

Change success changes without rollback or incident

Alert ownership alerts with an owner and runbook

Containment drills quarterly, once proven in offering 02

Cost visibility spend attributed and reviewed monthly

Decide today

- Packages for pilot use
- No 24x7 without funded roster
- Sponsor tower agreements

Decide after evidence or approval

- Service objective values (pilot)
- Rates and uplifts (Finance)
- ITSM integration per customer

90-day ask: budget and sponsor are inputs (deck 00 slide 10). Stop at day 45 if no tower agreements are signed.

APPENDIX

Technical and commercial appendix

Onboarding, monitoring, ITSM and AIOps, Agent 365 and Copilot Studio operations, containment and recovery, reviews, staffing, objectives, pricing, exit, data handling, audit evidence, delivery bench, account play, RACI and sources.

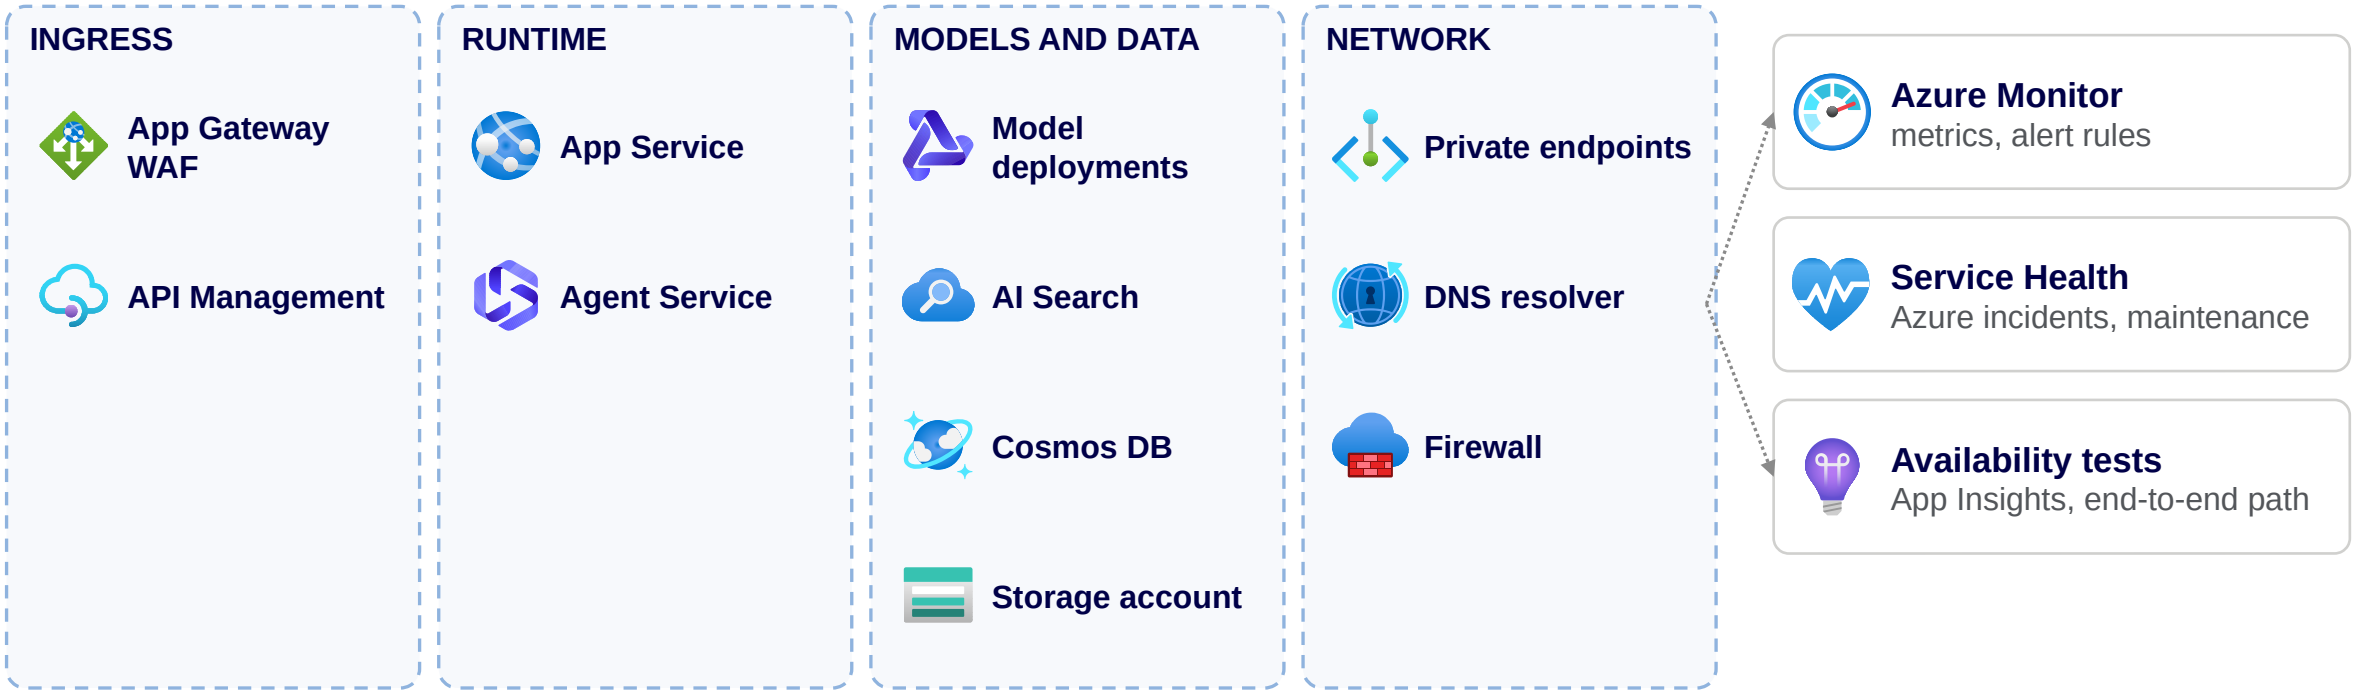

Appendix index

13 **A1** Onboarding and readiness gates
14 **A3** Health and dependency monitoring
15 **A4** Foundry observability, App Insights, Log Analytics
16 **A5** Alert ownership and routing
17 **A6** Incident, problem and change
18 **A7** Platform, quality and security lanes
19 **K** Kill-switch: how operations runs it
20 **K6** Kill-switch authority and liability
21 **A8** Controlled recovery
22 **A9** Capacity, quota and cost review
23 **A11** Backup and recovery responsibilities
24 **A12** Runbooks and specialist dependencies
25 **A13** Coverage, on-call and effort
26 **A16** Pricing logic
27 **A17** ITSM and AIOps integration
28 **A18** Agent 365 and Copilot Studio operations
29 **A19** Exit and transition plan
30 **A20** Staffing-to-price link
31 **DH1** Prompt and telemetry data handling
32 **AU1** Audit-ready control matrix and evidence pack
33 **Q1** Qualification scorecard and account shortlist
34 **E1** Estimate assumptions
35 **SEC1** AI threat model and controls
36 **SEC2** Regulation and EU AI Act roles
37 **G1** Glossary
38 **DP1** Delivery bench and presales kit
39 **AC1** Account play and contract risk
40 **C1** Cost layers and pricing formula
41 **R1** RACI matrix
42 **R3** Delivery and commercial readiness
43 **D1** Decision and approval register
44 **S1** Sources and verification dates
45 **S1b** Sources and verification dates (continued)

Service onboarding and readiness gates

Gate	Evidence required	Owner
Platform accepted	Offering 01 gates passed or equivalent review	CIS Infra
Inventory complete	Assets and agents in scope listed, owners named	CIS Infra with agent owners
Monitoring live	Alerts with owners and runbooks; telemetry healthy	CIS Infra
Access in place	PIM roles, break-glass, service desk queues	Customer with Security
Tower agreements	Resolver, hours and escalation per tower	Integrated service owner
Containment ready (only if in scope after 02 PoC)	K4 drills passed in non-production	Security with CIS Infra

Platform health and dependency monitoring

Signal	Example alert (proposed)	Owner
Model deployment	429 rate or latency above agreed level	CIS Infra, AI informed
Private DNS	Resolution failures for private endpoints	CIS Infra
Gateway	Backend circuit open; capacity units saturated	CIS Infra

VERIFIED 11 OCT 2026

Foundry observability and agent traces

Integration	What it gives operations	Limit
Application Insights per Foundry project	Runs, errors, traces, tokens per agent	Only after configuration; up to 15 min delay
Log Analytics workspace	Platform and gateway logs, KQL alerts	Ingestion cost; retention to agree
Foundry Control Plane inventory	Agent list with runs and errors (last month)	Supported platforms only
Correlation IDs	Join gateway call, agent run and tool call	Needs agent ID in every hop
Payload logging	Debugging	Redact; restrict access; short retention

Alert ownership and service desk integration

Incident or change	Primary resolver	Supporting dependency
DNS, network, endpoint or resource health	CIS Infra	Security for control changes; AI for runtime limits
Failed pipeline or infrastructure release	DevOps	CIS Infra for configuration; Security for controls
Stale index or failed ingestion	Data Engineering	Data owner for source quality and access
Poor answer or unauthorised agent action	AI	Security and Data Engineering as relevant
Security event	Contracted security resolver	CIS Infra and workload owners contain allocated parts
Unexpected spend	CIS Infra coordinates	AI explains usage; towers fix causes

Incident, problem and change management

Incident	Problem	Change
1 Single entry point	1 Recurring incident trend	1 Request with risk class
2 Lane triage	2 Root cause analysis	2 Pipeline-only to production
3 Resolver works, updates	3 Fix through change	3 Approval by customer authority
4 Close with cause	4 Review monthly	4 Rollback tested

Note: Model, prompt and agent changes follow the AI tower change path; platform changes follow CIS Infra’s.

Lane boundaries in detail

Aspect	Platform availability	Agent task quality	Security incidents
Accountable	CIS Infra	AI tower	Contracted security resolver
Typical signal	Health alert, 5xx, DNS failure	Evaluation drop, user complaint	Defender alert, abuse report
Measure	Availability, response, change success	Task success, escalation rate	Per security service terms
CIS Infra role	Resolve	Provide telemetry	Contain allocated components
Out of scope for CIS Infra	n/a	Prompt, model, evaluation fixes	Forensics, notification

Agent containment: how this offering contributes

1. **Block new requests**
   API Management ingress
2. **Cancel or isolate**
   runtime adapter
3. **Deny actions**
   outbound gateway, tool guard

What this offering provides

- Operates the containment design built and proven in offering 02
- Runs quarterly drills and keeps the runbook current
- Executes containment on platform layers when Security directs it
- Restarts only after two-person approval

Note: No universal instant stop, and the design is unproven until the PoC passes. Deck 02 builds it; deck 05 operates it.

PROPOSED, LEGAL TO CONFIRM

Who may stop an agent, who may restart it, and liability

Question	Proposed answer	Owner
Who may order a stop?	Named customer risk owner or delegated Security on-call; listed in the runbook	Customer risk owner
Who executes it?	CIS Infra on platform layers; AI tower and tool owners on their layers	Integrated service owner
Who may restart?	Two-person approval: customer business owner plus Security	Customer business owner
If a stop fails or is late	Escalate to break-glass path; record as incident; no penalty beyond agreed service levels	Security with CIS Infra
Liability position	Reasonable efforts on a tested runbook; no guarantee of instant stop; standard caps apply	Cognizant Legal
When is it in scope?	Only after the PoC passes and the drills are accepted	Offering owner

Controlled recovery after containment

Root cause
AI and Security confirm cause and fix

→

Approval
Two-person approval by named authority

→

Canary
Bounded traffic, close monitoring

→

Release
State version advanced; limits restored

→

Review
Evidence filed; drill updated

Limit: Completed side effects are not undone by restart. Compensation is a separate, workload-owned process.

Capacity, quota and cost review

Review item	Evidence	Typical action
PTU utilisation and coverage	Utilisation, reserved vs deployed, overflow share	Raise to FinOps; resize at term
Throttling	429 rate by deployment and caller	Rebalance routing; request quota
Quota headroom	Quota vs planned deployments	Request quota early
Spend vs budget	Actual and forecast by owner	Explain variance; fix causes
Model lifecycle	Retirement dates of deployed models	Plan migration and re-benchmark

Backup and recovery responsibilities

Component	Recovery method	Responsible	Customer decision
Platform resources	Redeploy from IaC	CIS Infra with DevOps	RTO per environment
Cosmos DB (agent state)	Continuous or periodic backup	CIS Infra	Backup mode and retention
Storage account (documents)	Soft delete, versioning, replication	CIS Infra	Retention and replication
AI Search index	Rebuild from source	Data Engineering	Rebuild time accepted
Model deployments	Redeploy; capacity may not be available	CIS Infra with AI	Second region or not
Gateway configuration	Redeploy policies from repository	CIS Infra with DevOps	Multi-region or not

Runbooks, escalation and tower agreements

Agreement field	Content
Lead and backup	Named resolver per tower
Hours	Must match or exceed the sold package
Targets	Internal response aligned to customer objectives
Escalation	Path and contacts to tower leadership
Access	Roles and PIM for each resolver
Charging	Internal charge or attributed revenue, per Finance

PLANNING ASSUMPTION

Service hours, on-call and effort allowances

Package	Coverage	Staffing model (estimate)	Effort allowance
Foundation	Business hours, one time zone	Shared pool, named lead	Monthly hours band; overage at rate
Extended	Extended hours, two time zones	Follow-the-sun pool	Higher band
Continuous	24x7	Funded on-call roster, about 5 people per seat	Roster cost plus band

Before any 24x7 commitment, all of these must be true

Prerequisite	Evidence
Funded on-call roster	About 5 people per 24x7 seat, approved by delivery leadership
Paging and escalation tooling	Tested call-out with named contacts
P1 runbooks	Runbooks for outage and containment scenarios
Tower agreements with 24x7 escalation	Signed by Security, AI and Data Engineering leads

Limit: About 8,760 hours a year per seat ÷ about 1,700 productive hours per person. Estimate only. Bands: A20.

Pricing logic for the recurring service

Monthly fee = base service fee + Σ (asset units x unit rate) + coverage uplift + specialist allowance
One-time = onboarding (gates in A1) + remediation work packages, if any

Term	Driver	Missing input (owner)
Base service fee	Governance, reporting, service management	Base rate (Finance)
Asset units	Environments, AI resources, gateway APIs, agent bands	Unit rates (Finance)
Coverage uplift	Extended or continuous hours	Roster cost (delivery leadership)
Specialist allowance	Tower hours inside the service	Tower agreements (tower leads)
Overage	Hours or assets above band	Overage rate (Finance)

ITSM and AIOps integration

Customer tool	Integration path	Status	Notes
ServiceNow ITOM	Secure Webhook action group (Secure Export)	Supported	Entra app registration needed
BMC Helix	Secure Webhook action group (Secure Export)	Supported	Same pattern
ServiceNow ITSM (legacy connector)	ITSM action	Being deprecated	Do not use for new work
Other ITSM tools	Generic webhook or Logic Apps	Customer build	Scope per customer

Correlate

Alert processing rules group related alerts

Reduce noise

Dynamic thresholds; every alert has an owner

Automate

Runbooks via Azure Automation or Logic Apps

Note: AIOps here means native correlation and automation. Third-party AIOps tools are the customer choice.

Operating Agent 365 and Copilot Studio agents

Catalogue item	Frequency	CIS Infra does	Others do
Agent registry upkeep (Agent 365)	Weekly	Reconcile registry with catalogue; flag unowned	Agent owners confirm
Dormant and orphaned agent review	Monthly	Prepare list and evidence	Owners keep or retire
Agent identity hygiene (Entra)	Monthly	Report stale identities and access	Security approves changes
Copilot Studio connectors via gateway	On change	Gateway APIs, limits, logging	Power Platform team admin
Containment drill	Quarterly, after 02 PoC	Run drill on platform layers	Security directs; AI verifies
Model retirement watch	Monthly	List affected deployments, plan migration	AI tower re-evaluates

Limit: Microsoft 365 Copilot is owned by the Cognizant M365 and D365 teams and is outside this service.

Exit and transition: the way out is planned on day one

1 Notice	2 Inventory	3 Knowledge transfer	4 Access handover	5 Closure
Exit plan activated; owners named	Assets, agents, alerts, runbooks confirmed	Shadow, then reverse shadow	Roles removed; break-glass rotated	Final report; open items handed over

Customer keeps: runbooks, infrastructure as code, alert rules, dashboards, catalogue data and reports, all in customer tenants and repositories.

Decision: Exit package: 15 to 30 role days over 4 to 6 weeks (estimate). Refresh the plan every year.

Staffing behind each package

Package	FTE (estimate)	Role days per month	Indicative role mix
Foundation	1.5 to 3	30 to 60	Service lead (part), platform engineers, shared on-call
Extended	3 to 5	60 to 100	Service lead, engineers in two time zones
Continuous	6 to 10	120 to 200	About 5 people per 24x7 seat, plus lead and engineers
Specialist allowance	Per agreement	Per agreement	AI, Data Eng., Security hours inside the fee

Note: About 20 role days per FTE per month. Illustrative $1,000 per role day, not a Cognizant rate.

Telemetry stores counts and IDs, not prompts, by default

Data	Logged by default?	Protection	Retention (proposed)	Access
Platform metrics and alerts	Yes	No content	90 days	Operations team
Agent traces (spans, tool names, status)	Yes	Content fields excluded by default	30 days	Operations, AI tower
Prompt and response content	No (opt-in)	Redaction, restricted workspace	7 to 30 days if enabled	Approved named engineers
Incident and change records	Yes	In customer ITSM	Per customer policy	Service desk
Containment evidence	Yes	Immutable storage policy	Per audit policy	Security, auditors

Decision: Content logging is opt-in only, approved by Security and the data owner. The customer sets final retention.

PROPOSED DELIVERABLE

Audit-ready evidence: what internal audit can test

Control objective	Test	Evidence source
Every operated agent has a current owner	Monthly ownership check	Catalogue, review queue
Incidents meet response targets	Sample tickets against targets	ITSM reports
Changes are approved and tested	Sample changes; check approval and rollback plan	ITSM change records
Containment drills are run and pass	Quarterly drill evidence	K4 evidence pack
Privileged access is just in time	Review PIM activations	Entra PIM reports

Note: Deliverable: control matrix plus evidence pack, refreshed monthly in managed operations. Not an assurance opinion.

Qualification scorecard and account shortlist template

Criterion (score 0, 1 or 2)	Evidence
Funded workload	Named owner, budget route, decision date
Platform authority	Who can approve tenant and network changes
Executive sponsor	Named and engaged
Data access	Source owner and rights confirmed
Region and capacity	Model, deployment type and quota checked
Data residency gate	UK or Middle East in-country need checked (deck 01)
Regulated bank	Model risk and DORA position known
Platform accepted	Offering 01 gates or equivalent
Coverage need	Hours and containment expectation

Account shortlist (template, empty)

Account	Sponsor	Workload	Blocker	Score	Next action

Decision: Quote implementation at 14+ with no zero on funding, authority, sponsor or residency. Otherwise sell the assessment.

ESTIMATE, NOT APPROVED

How the effort and duration ranges were built

Package	Low case assumes	High case assumes
Foundation	One environment, ten agents, one region	Three environments, fifty agents, two regions
Extended	Two time zones, change windows standard	Strict change windows, several runtimes
Continuous	One 24x7 seat	Two seats plus specialist escalation
Onboarding	Platform built by offering 01	Inherited platform with gaps
Exit and transition	Customer team ready	New provider, full shadow period

Basis and recalibration plan

Basis: bottom-up author estimate from staffing: about 20 productive role days per FTE per month; onboarding = runbooks, alert routing, readiness gates; exit = knowledge transfer and access handover. Recalibrate after every pilot: record actual role days per package, compare with the band, and reset bands each quarter. Owner: integrated service owner with Finance.

AI threat model: what can go wrong, and who controls it

Threat	Example	Control	Owner
Privileged misuse	Operator changes production unsafely	PIM, just-in-time access, change approval	Customer with Security
Rogue agent	Agent acts outside scope	Containment runbook, quarterly drills	Security directs, CIS Infra executes
Alert blind spot	Attack signal ignored	Defender alerts routed to security resolver	Security
Stale identities	Unused agent identities keep access	Monthly identity hygiene review	Security with CIS Infra
Model retirement	Unsupported model in production	Monthly retirement watch	AI tower
MCP tool trust boundary	New tool added outside change control	Change process requires API Center registration	CIS Infra with Security
Supply chain	Unpatched runtime image or extension	Patch cadence, image scanning, change approval	CIS Infra, DevOps

Regulation: who holds which duty, and where we help

Party	Likely EU AI Act role (indicative)	What this offering supports
Customer deploying AI systems	Deployer (usually)	Ongoing monitoring, incident records and drill evidence
Customer building its own AI system	Provider	Post-market monitoring and incident reporting inputs
Cognizant CIS Infra	Usually neither: infrastructure service provider	Role stated in the contract; Legal confirms

Area	Checkpoint	Status (checked 11 Oct 2026)
EU AI Act	Annex III high-risk duties from 2 Dec 2027; Annex I from 2 Aug 2028	Third-party summary (Orrick); EUR-Lex not verified
EU DORA	ICT risk and ICT third-party contract terms for financial entities	Applies from 17 Jan 2025 (EUR-Lex)
EU NIS2	Cyber risk management for essential and important entities	National laws; deadline 17 Oct 2024
UK	Regulator-led AI principles; UK GDPR	Not re-verified: confirm current position
UAE	Federal Decree-Law 45 of 2021 (personal data)	Executive regulations: verify status
Saudi Arabia	PDPL (enforceable Sep 2024); NCA cloud controls CCC-1:2020	Third-party summary; verify transfer rules
US banks	Interagency model risk guidance (17 Apr 2026) replaced SR 11-7	Generative and agentic AI out of scope; governance still expected

Glossary of terms used in this deck

Term	Meaning
A2A	Agent-to-agent protocol for agents calling other agents
Agent 365	Microsoft control plane to register, observe and govern agents (per-user licence)
API Center	Azure registry for APIs and MCP servers; decides which tools exist
APIM	Azure API Management; the gateway that controls traffic
Copilot Studio	Microsoft low-code tool to build agents; consumption in Copilot credits
Data Zone	Model processing inside a Microsoft data zone (US, EU or APAC)
DORA	EU Digital Operational Resilience Act for financial entities
FOCUS	FinOps Open Cost and Usage Specification for cost data exports

Term	Meaning
Foundry	Microsoft Foundry: Azure platform for models and agents
FTE	Full-time equivalent person
MCP	Model Context Protocol: standard way for agents to call tools
MRM	Model risk management (banking supervision)
NIS2	EU directive on cybersecurity for essential sectors
PAYG	Pay as you go: pay per token used
PDPL	Personal Data Protection Law (Saudi Arabia, UAE)
PIM	Entra Privileged Identity Management: just-in-time admin access

Term	Meaning
PTU	Provisioned throughput unit: reserved model capacity, billed per hour
RACI	Responsible, Accountable, Consulted, Informed
RFP	Request for proposal
RTO / RPO	Recovery time objective / recovery point objective
SOW	Statement of work
Token	Unit of text a model reads or writes; the main pricing unit
TPM	Tokens per minute

INPUT REQUIRED

Who delivers it, and what sellers need before day one

Role	Skills needed	Certification (verify current)	Ramp-up (estimate)	Bench now
Service lead	ITSM, service reviews, tower coordination	ITIL 4 Foundation	2 weeks	Input required: delivery lead
Operations engineer	Azure Monitor, alerts, automation	Azure Administrator Associate	2 weeks	Input required: delivery lead
On-call engineer	Incident response, runbooks, containment drills	Azure Administrator Associate	2 weeks	Input required: delivery lead
Security liaison	Security resolver handoffs, evidence	Security tower role	1 week	Input required: delivery lead

Presales kit item	Status	Owner
Executive deck, talk tracks, customer pitch	Exists (v4.0 draft)	Offering owner
Demo environment	To build	CIS Infra lab owner (input required)
SOW template and estimator	To build	Presales lead with Finance
RFP answer bank	Draft exists (register)	Presales lead
Case study	After first pilot	Account team
Runbook library and service report template	To build	Offering owner 05

How account teams use it, and the contract risks to manage

Fits in the account plan

Existing Cognizant infrastructure service: extend by change control.

First deal (illustrative)

Onboarding $20k to $40k, then $30k to $60k a month.

Expansion path

More environments, coverage hours and agents.

Business-led entry

Head of operations: AI services run with named owners and targets.

Contract topic	Proposed position	Owner
Liability cap	Per Cognizant standard terms; no uncapped liability for agent behaviour or customer data	Legal
Service-level penalties	Only on response targets inside coverage hours; none on Azure availability	Legal with delivery
IP of accelerators and code	Cognizant keeps reusable accelerators; customer owns its configuration and code	Legal
Change control	New scope, regions or runtimes priced by change request	Delivery with Finance
Service levels	Response targets only, inside coverage; restore after dependency tests	Delivery with Legal

Microsoft motion: engage the account team and partner manager; sustains production workload consumption month after month.

NO APPROVED QUOTE

Six cost layers are priced and owned separately

Layer	Applies to this offering	Pricing formula or unit	Missing input (owner)
1 CIS Infra services	Onboarding and remediation	Fixed fee; role days x rate	Sell rates (Finance)
2 Specialist towers	AI, Data Eng., Security support	Internal agreement or work package	Tower agreements (tower leads)
3 Recurring managed service	This offering	Formula in A16	Base, unit and uplift rates (Finance)
4 Azure platform consumption	Monitoring, logs, backup	Meters x quantity	Customer agreement prices (customer)
5 Model consumption	Customer workloads	Tokens or PTU	n/a to the service fee
6 GPU hosting	Only if self-hosted	VM hours plus operations	Separate scope if selected

Revenue recognition (Finance owns): Monthly managed service fee; onboarding and exit as fixed fees. Owner: Finance.

Limit: Layers 4 to 6 are customer Azure spend unless a resale agreement says otherwise. They are not CIS Infra services revenue.

PROPOSED, VALIDATE WITH TOWERS

Delivery RACI: one accountable role per activity

Activity (proposed, validate with towers)	CIS Infra	Secu-rity	Dev-Ops	AI	Data	Data Eng.	Integr. service owner	Cust. work-load owner	Comm. / fin.
Agent 365, Entra CA, Purview and Defender policy	R	A	I	C	I	I	I	C	I
Service design and onboarding	R	C	C	C	I	I	A	C	C
Monitoring and alert implementation	A/R	C	C	C	I	C	I	I	I
Onboarding readiness testing	R	R	C	R	I	I	A	C	I
Service acceptance	R	C	I	C	I	I	R	A	I
Platform incidents and changes	A/R	C	R	C	I	I	I	I	I
Agent quality incidents	C	C	I	A/R	C	C	I	C	I
Security incidents	R	A/R	I	C	I	I	C	C	I
Containment execution	R	R	I	R	I	I	A	C	I
Recovery and restart approval	R	C	R	R	I	C	C	A	I
Monthly governance and reporting	R	C	I	C	I	C	A	C	C
Pricing, attribution and renewal	C	C	C	C	I	I	R	I	A

A accountable (one per row) **R** responsible C consulted I informed. **Integrated service owner** = named Cognizant delivery lead for the end-to-end outcome.

Delivery and commercial readiness checklist

Item	This offering
Entry criteria	Accepted platform (offering 01 or equivalent), inventory, owners, ITSM route
Discovery inputs	Asset list, agents, alerts, runbooks, coverage need, tower contacts
Deliverables	Operated service, monthly report, reviews, drills, runbooks maintained
Scope boundaries	Contracted assets and coverage; specialist lanes per agreements
Dependencies	Tower agreements, security resolver, customer service desk
Delivery phases	Onboard, stabilise, operate, review (estimate per engagement)

Item	This offering
Acceptance criteria	Onboarding gates A1; service acceptance by customer
Customer responsibilities	Service desk, approvals, containment authority, data owners
Pricing units	Base + asset units + coverage uplift + allowance (A16)
Change-control triggers	New assets above band, coverage change, new runtime or region
Support handoff	Exit plan agreed at start; exit package (A19)
Success indicators	Objectives met, cost reviewed, alert ownership; drills once in scope

Decisions that need an owner and a date

Decision	Decide when	Proposed owner	Evidence needed
Proposed packages for pilots	Now	Offering owner	This deck
No 24x7 without funded roster	Now	Delivery leadership	Policy statement
Service objectives values	After pilot	Delivery leadership with customer	Pilot ticket data
Base, unit and uplift rates	Finance approval	Finance	Costing model
Tower support agreements	Tower agreement	Tower leads	Signed agreements
Security resolver model per customer	Per engagement	Customer CISO delegate	Existing SOC contracts
Staffing bands behind packages	Before first quote	Delivery leadership	Pilot effort data
